Developed proficiency in core concepts, including object-oriented programming, data structures, and algorithms. Experience with data structures and algorithms.
- 

## SKILLS

---

### Technical Skills:

---

- Programming Languages:** Java, Python
  - Web Development:** Html, CSS, JavaScript, Django
  - Data Science:** Python, Numpy, Pandas, Sklearn
- 

## PROJECTS

---

### Movie Rental (Django)

- The Movie Rental System is a Django-based web application designed to manage movie rentals.
- It allows users to create accounts, rent movies, and view their rental history.
- The system also provides administrators the capability to add new movies to the inventory.

### Portfolio Website (Django)

- The Portfolio Website is a Django-based web application designed to showcase a collection of projects.
- It serves as a platform for presenting details about various projects, including their titles, descriptions, and associated technologies.
- Users can navigate through the project list, view project details, and access additional information about each project.

### PELTIER REFRIGERATOR

- This compressor less refrigeration system uses the temperature difference created by the Peltier module between two electrical junctions to create cooling effect on one end.
- Desired temperature using LM35 and auto power cut using Arduino Uno when the optimum temperature has reached.
